Professional Summary

Network Infrastructure & Cybersecurity Engineer with a Bachelor's Degree in Cybersecurity and Computer Networks (GPA: 93%). Experienced in designing and supporting MikroTik and Cisco network infrastructures, including VLANs, PPPoE, Hotspot services, Firewalls, and Load Balancing. Contributed to Smart-SAM, a cybersecurity-focused password management platform built on Zero-Trust and Zero-Knowledge principles. Passionate about networking, cybersecurity, infrastructure management, and continuous professional development.

Professional Projects

Smart-SAM — Zero-Trust Password Security Platform

- Participated in developing a cybersecurity-focused password management platform.
- Contributed to testing, documentation, and security validation.
- Worked with Zero-Trust, MFA, and secure password management concepts.

Enterprise MikroTik Network Deployment

- Designed and deployed a production MikroTik network infrastructure supporting 100+ active users.
- Implemented VLAN segmentation, PPPoE authentication, Hotspot services, Firewall security policies, and Load Balancing.
- Performed network troubleshooting, monitoring, maintenance, and performance optimization.
- Improved network stability, service availability, and operational efficiency.

Flutter-Based Network Card Management Application

- Developed a Flutter-based application to support network card distribution and management operations.
- Integrated Firebase services for backend functionality.
- Implemented basic operational features to support daily network management tasks.

Technical Skills

Networking: MikroTik, Cisco, Routing & Switching, VLANs, OSPF, PPPoE, Hotspot, Firewall, Load Balancing
Systems: Windows Server, Linux, VMware
Tools: EVE-NG, GNS3, Cisco Packet Tracer
Databases & Cloud: MySQL, Firebase, AWS
Programming: Python, Flutter, PHP

Professional Experience

Ministry of Industry and Trade

2024

Data Management & Administrative Support

- Managed and maintained organizational records using Microsoft Excel.
- Organized and updated business data repositories.
- Supported administrative operations through accurate data processing and reporting.

Public Telecommunications Institute

Jan 2023 – Apr 2023

Network Training Program

- Participated in practical networking and telecommunications training.
- Assisted in network configuration and troubleshooting activities.
- Gained hands-on exposure to network infrastructure and operational procedures.

Education

Bachelor's Degree in Cybersecurity and Computer Networks

2026

Modern Science University, Sana'a, Yemen

GPA: 93%

Certifications

- Cisco Certified Network Associate (CCNA) — 2023
- MikroTik Certification — 2023
- CompTIA A+ — 2024
- Windows Server Training — 2025
- ICDL — 2021
